

BOARD OF CANAL PRESIDENTS

SALT LAKE CITY, UTAH

UTAH AND SALT LAKE CANAL CO.
EAST JORDAN IRRIGATION CO.
JORDAN AND SALT LAKE CITY CANAL CO.
SOUTH JORDAN CANAL CO.
NORTH JORDAN IRRIGATION CO.

OFFICE
401 CITY AND COUNTY BUILDING

December 30, 1932.

Mr. George M. Bacon,
State Engineer,
State Capitol,
City.

Dear Sir:

The Board of Canal Presidents wish to call your attention to the elevation of the water surface of Utah Lake as of this date and to remind you that the water supply for 1933 up to the present time does not warrant us in assuming that it will be as favorable as in 1932, as the snowfall is lighter this season, and the available storage between October 30th and December 30th of 1932 was 9,000 acre feet less than for the same period in 1931, as shown by the following table.

Table

Date	Gage Height	Total Capacity in Acre Feet	Storage in Acre Feet from Oct 30 to Dec 30
Oct 30, 1931	-8.40	182,500	
Dec 30, 1931	-7.43	243,500	61,000
Oct 30, 1932	-8.12	199,500	
Dec 30, 1932	-7.31	251,500	<u>52,000</u>

The difference, or the amount stored Oct 30 to Dec 30, 1931, in excess of the same period 1932	9,000
--	-------

During the same periods of time there was pumped from Utah Lake in 1931 - 1,385 acre feet; and in 1932 - 1,048 acre feet.

With the above facts before us we urge you to notify the secondary users of the seriousness of the water condition, and to inform them that the primary or decreed users will expect to have their rights satisfied before the rights of the secondary users, during the coming irrigation season.

Respectfully yours,

WDB:CF

Chairman
